

OUTLINE

- a. Winch
- i. A winch is provided for getting the vehicle out when it is stuck (at a standstill), when ascending or descending on steep roads, or when moving a load.
- b. Supplemental Restraint System
- i. The Supplemental Restraint System (SRS) driver and front passenger airbags are used as supplements to the seat belts to help reduce the shocks to the head and chest of the driver or front passenger in the event of a frontal collision.

c. Color
