

## ■ STARTING SYSTEM

Conventional planetary reduction type starter is used.

### ► Specifications ◀

|                                    |          |             |
|------------------------------------|----------|-------------|
| Rating Output                      |          | 3.0 kW      |
| Rating Voltage                     |          | 12 V        |
| Length* <sup>1</sup>               | mm (in.) | 237 (9.33)  |
| Weight                             | g (lb)   | 7450 (16.4) |
| Rotational Direction* <sup>2</sup> |          | Clockwise   |

\*<sup>1</sup>: Length from the mounted area to the rear end of the starter.

\*<sup>2</sup>: Viewed from pinion side.

## ■ SERPENTINE BELT DRIVE SYSTEM

- A serpentine belt drive system, which drives all accessory components by a single V-ribbed belt, is used. It reduces the overall engine length, weight and number of engine parts.
- An automatic tensioner is used. This makes the tension adjustment unnecessary.
