

PROCEDURE

1.REMOVE ECM

89661

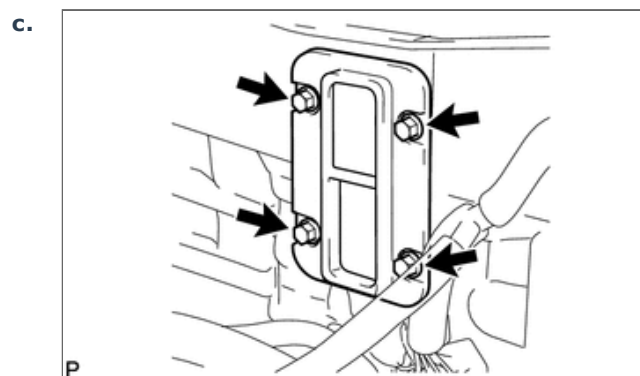

Open the 2 levers while pushing the locks on the 2 levers.

NOTICE:

Make sure that the lock levers are opened 90° as shown in the illustration before disconnecting the ECM connectors. Failure to do this may cause the ECM connectors to break.

b. Disconnect the 2 connectors.

Remove the 4 bolts and ECM.

2.REMOVE GASKET

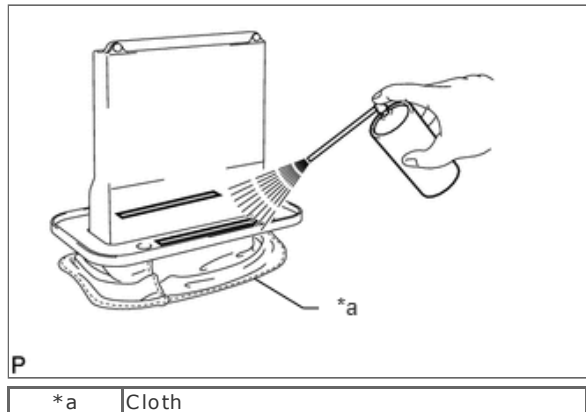

89664A

a.

Peel off the gasket.

b.

Spray gasket remover or equivalent on the remaining gasket tape.

NOTICE:

When using gasket remover or equivalent, cover the ECM connectors with a cloth.

c. Remove the gasket tape without using bladed objects.
